

# LASER HAIR REMOVAL

Most people find the Pain-Free, Hair-Free™ diode laser hair removal system quite comfortable. While pain tolerance is subjective, many patients describe it as soothing as a "Hot stone massage." Most conventional laser hair removal technologies utilize massive amounts of heat to destroy hair follicles and ensure permanent reduction. Pain-Free, Hair-Free™, on the other hand, is a unique technology that delivers low heat levels at a fast delivery. By utilizing low heat, Pain-Free, Hair-Free™ decreases the pain and minimizes the risk of side effects.
